This section of the 2014 Preqin Global Private Equity Report analyzes the most consistent performing private equity fund managers that raise buyout funds, venture capital funds and funds of funds, as well as fund managers that raise various other private equity fund strategies such as growth, secondaries, etc. This analysis does not seek to endorse the fund managers listed in the tables but to illustrate those that have performed the most consistently.

The private equity fund managers listed in the following tables are managers for which Preqin holds fund performance data and their funds have been assigned quartile rankings. Preqin only assigns quartile rankings to mature funds where the IRR is more meaningful, so funds with a more recent vintage (2011-2013) will not have been assigned quartile rankings. The tables are further restricted to active fund managers that have raised at least three funds of a similar strategy in the past six years or are currently raising a fund of a similar strategy.

*The fund managers in the tables are ordered by their average quartile ranking scores, from lowest to highest. The average scorings are calculated by assigning top quartile funds with a score of one, second quartile funds are given a score of two and so on, and then taking an average of these scores. An average score close to 1.00 implies that fund manager is among the most consistent performing fund managers. Only fund managers that have achieved an average score of 1.50 or better are listed in the tables. A more complete list, which allows you to filter by fund type and geographic focus, can be found on Preqin's **Performance Analyst** online product. Performance Analyst is the industry's most extensive source of net-to-LP private equity fund performance, with full metrics for over 6,700 named vehicles.*
